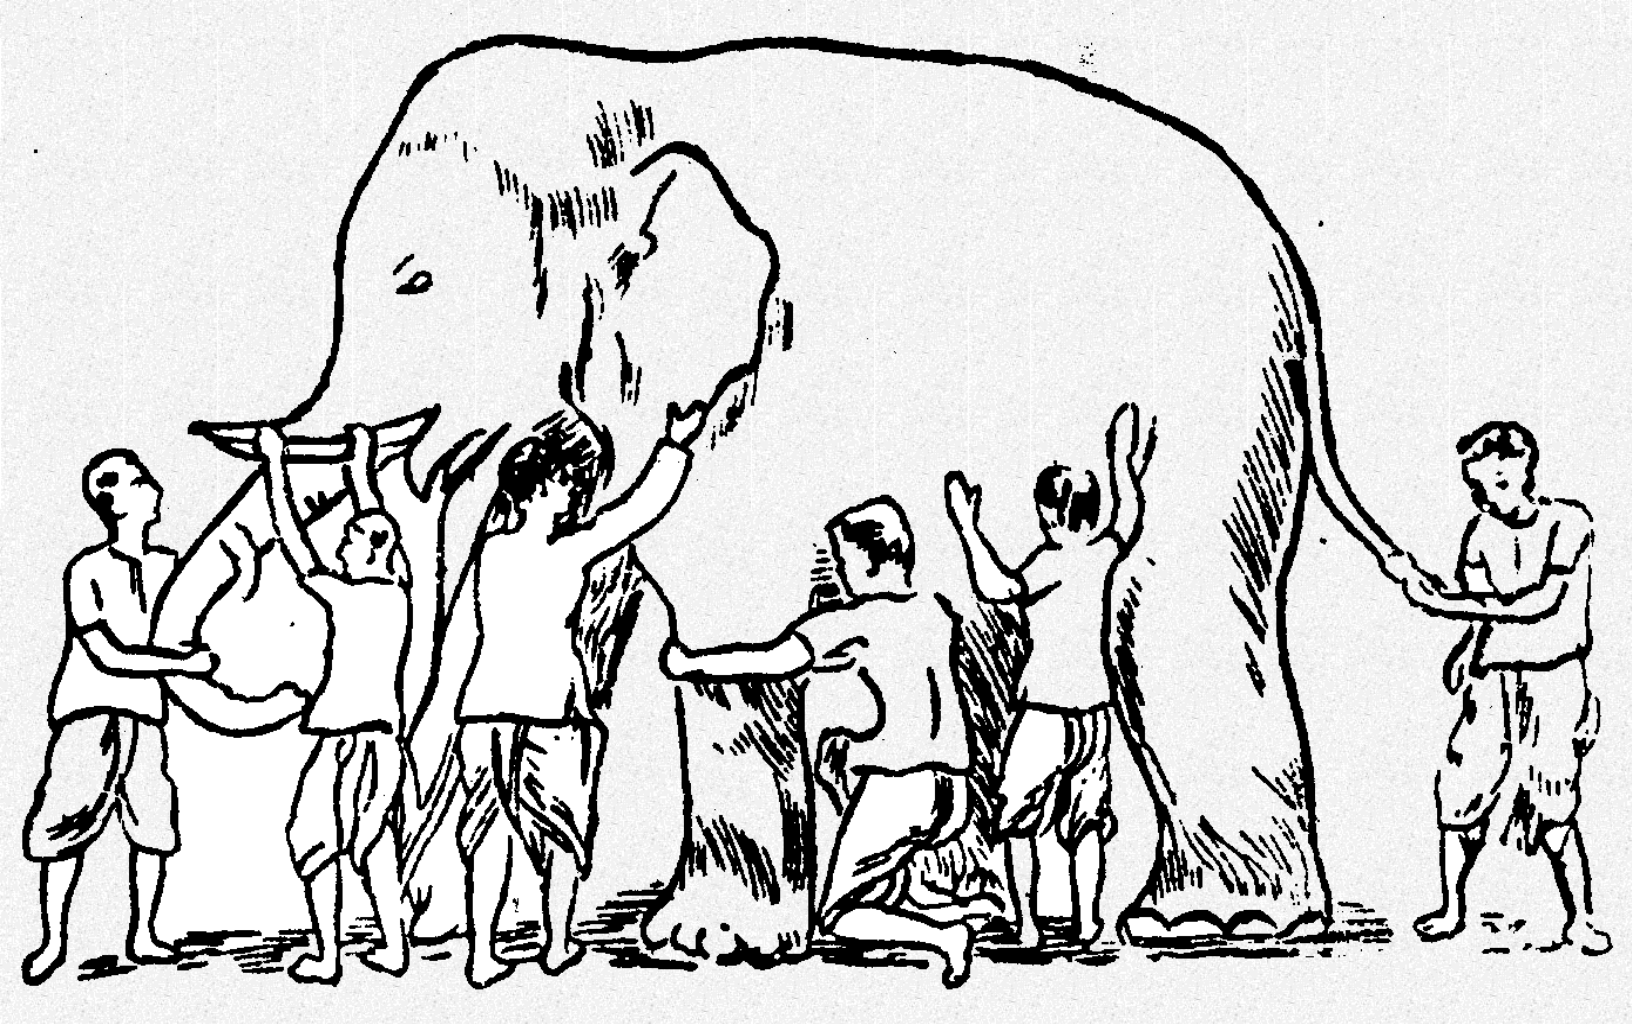
What is .Net?

- It is a platform.
- It is an environment that enables to develop different applications.
- It is a technology.
- And so on……

Let Us Consider Story of Elephant and Six Blind Men



- "Hey, the elephant is a pillar," said the first man who touched his leg.
- "Oh, no! it is like a rope," said the second man who touched the tail.
- "Oh, no! it is like a thick branch of a tree," said the third man who touched the trunk of the elephant.
- "It is like a big hand fan" said the fourth man who touched the ear of the elephant.
- "It is like a huge wall," said the fifth man who touched the belly of the elephant.
- "It is like a solid pipe," Said the sixth man who touched the tusk of the elephant.

.NET is an integral part of many applications running on Windows and provides common functionality for those applications to run.
